Engineer, Full Stack developer with +9 years of experience, involved in the entire software development life cycle using Java EE, Node, React and Angular. I have experience in Backend and Frontend, mobile applications and server environments. I am proactive and enjoy teamwork. I have experience leading teams using agile methodologies. I am currently looking for remote positions that allow me to grow both personally and professionally.

EXPERIENCE

Freelance, Full Stack Developer — *2015 - currently*
- Analysis, development and implementation for the process of generating digital invoices and electronic signatures.
- Streamlining and automation of citizen complaints through the design and development of a mobile application for the management, organization and display of information.
- Analysis, development and implementation for the parameterization and configuration of Banco Santander's dashboard, regulatory framework management application for handling sensitive data using azure funtion(Snowflake), node and angular.
- Leader, design, analysis and development of a reusable system adaptable to any type of small and medium-sized business (Purchases - Sales - Stock - Movements - Cash registers - Reports - Customer file).

Stack: Google Api, Google Cloud, Java EE, Maven, MyBatis, Spring, Microservicios, Scrum, Click Up, WildFly, Linux, Angular 8+, Spring, Jira, Slack, Wildfly, Scrum, React Native, Redux, Navigate, Google Play Console, Cloud Binary, Node JS, TypeScript, Azure Function, Snowflake.

GV-CORP, Analista Desarrollador — *Marzo, 2021 - currently*
- Development of a Banking Core that allows bank employees to obtain information about lines of credit, loans, customers, accounting and reports.
